CS5597: Directed Reading

Distributed Classification for Deep Learning

Name of the Instructor: Dr. Yugyung Lee

Name of the Student: Sidrah Junaid

Student ID:16225745

Semester/Year: Spring 2017

Project Progress Report

Date: February 1, 2017

Regarding the progress of the Project I have completed,

- The installation of Tensorflow and Pycharm on Linux machine.
- Studied about tensorflow library for machine learning.
- Studied about the classification concept with neural network.
- Studied about the formation of different neural networks and how it works.
- Examined the MNIST dataset using different existing examples to find out the accuracy of the results.
- Convolutional neural network is suitable for image classification indicated by different research papers as it can deal with large dataset as well.
